

# Chana of England

**Nottingham, England**

This week, SOTW is a little different... We are featuring an EU girl! Read on to hear all about her!

Hi everyone! My name is Chana Lent, I'm 12 years old and I am on Shlichus in Nottingham England. I am in G6-7 EU. I have 4 siblings KA"H (2 sisters 2 brothers) and I am the oldest. I started online school when I was around 5 years old and I obviously enjoyed it because I've stayed for 7 years ;) My favorite part of SOS is being with friends from all over the world, even if I have never seen them before! If I could create a new feature in SOS it would be a de-freeze machine, because everyone always gets frozen

We are Campus Shluchim. There are 2 Universities here, and around 1000 Jewish students. There is also a small Jewish community, I really enjoy chatting to all the students, especially when we have between 80-120 people every Friday night! Nottingham is also in a good area of England, because it's only 2 hours away from London and Manchester (two cities with big Jewish communities).

When I was 3-4 years old, I was not shy at all and I used to just go over to random students and just chat to them. One time, It was Friday night and I walked over to a student and told her pointing at her dress "Your not Tznius!!!!". Another time I walked over to the same student who was really short and asked her with a very curious voice "Why are you so little?" Fortunately, she didn't mind and explained to me that she's little because her parents are also little.

**Me, my sister and my parents when we first moved here on Shlichus**

**Giving out lemonade and snacks to students**

In our spare time, me and my siblings love making things out of Polymer oven bake clay. On the next page are instructions on how to make it! (Send in a picture holding yours when it's finished)

*I hope you enjoyed hearing a little bit about my Shlichus in Nottingham and come visit soon!!*

# Polymer Charms

Roll a ball of light brown/cream colored polymer clay.

Place on top of doughnut

Add any decorations you would like

Flatten it a little

Poke hole again through icing

Poke a hole down the middle with a toothpick

Make 2 indents for eyes

If you want it to be a charm, you can add an eye-pin. Then bake according to packages instructions, and Voila!

Take a piece of colored polymer clay and roll it out

Put in the eyes

Cut out a circle or flower shape for icing

Roll tiny coil of polymer clay and shape in to a U for the mouth.
